(54) Title: **RECORD CARRIER**

$$P = X^{14} + X^{12} + X^{11} + X^{10} + X^4 + X^3 + X^2 + 1$$

(57) Abstract: The present invention relates to a record carrier for storing information according to a standardized format. The record carrier comprising address information comprising address data bits indicating a position on the record carrier, the address data bits being arranged according to the standardized format, and error-protection parity bits for detecting errors in the address data. The error-protection parity bits deviate from the error-protection parity bits according to the standardized format. The invention further relates to a device for reading out the record carrier according to the invention.

## \* Special categories of cited documents:

- \*A\* document defining the general state of the art which is not considered to be of particular relevance
- \*E\* earlier document but published on or after the international filing date
- \*L\* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another claim or other special reason (as specified)
- \*O\* document referring to an oral disclosure, use, exhibition or other means
- \*P\* document published prior to the international filing date but later than the priority date claimed

- \*T\* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- \*X\* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- \*Y\* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- \*A\* document member of the same patent family
